Portfolio

Mitchel Leffers

Planning

- Firstly I really wanted to have a simple approach which would be the bare minimum basics required of a portfolio but has the potential for futures.
- I watched a lot of youtube videos in the days leading up to the assignment.
- Solely the design I came up with is original but I implemented certain features which had caught my eye.

Trello

Portfolio ☆ | Personal | ⊕ Public | ML ☒ | ··· Show Menu

| Futures ···	Back log ···	To do ···	Doing ···	Done ···	+ Add another li
▬▬▬ Add a text bubble	▬▬▬ Presentation	+ Add a card	▬▬▬ ReadMe	▬▬▬ Short answers	
▬▬▬ Contact me, get.chomp feature for customers.	+ Add another card		+ Add another card	▬▬▬ Make the website reactive	
▬▬▬ Make a cool video				▬▬▬ Make logo responsive	
▬▬▬ Curve the right angle top left corner				▬▬▬ Create github repo	
+ Add another card				▬▬▬ Highlight selected page	
				▬▬▬ Select a theme	
				▬▬▬ Select font	
				▬▬▬ Fill in sub categories	
				▬▬▬ Selected page title highlighted	
				▬▬▬ Perfect the reactive positioning of links	
				+ Add another card	

Build Process

- I had a bit of a poor build process initially but once I had a clear picture of my scope I was able to set up Trello and actively use it to slowly tick off each job in order of priority.

Challenges

- The biggest challenge was page layout and making it responsive.
- I would have everything working as intended and then add one logo or image and I would have to muck around with different alignment options.
- Another challenge I really enjoyed was coming up with a strategy so when hovered links were enlarged it would not affect neighbouring elements.
- Another challenge which is still an issue was maintaining the same theme but making the content readable.

Least favourites-

- I really enjoyed this assignment and if I had to pick a negative it would only be actually writing the Portfolio content.

Favourites-

- I enjoyed the assignment a lot, it had a good mix of challenges, design and code.
- I liked it when I worked out a way to stop the hover enlargement of links affecting neighbouring elements.
